**Report**

No.: 2211-N-13136  
Date of arrival: 10-11-2022  
Date of report: 15-11-2022

Patient identification:	Dog	male	* 01.08.22
	Cavalier King Charles Spaniel		
Owner / Animal-ID:	Zijp-Bruin, Y.A.E.J.		
Type of sample:	Swabs		
Date sample was taken:			

Name: **Trusties Roeland Tuur**  
Stud book no.: **NHSB 3281773**  
Chip no.: **528140000862546**  
Tattoo no.: **---**

**Dry Eye Curly Coat Syndrome (CCS) - PCR**

Result: Genotype N/DECCS

Interpretation: The examined animal is heterozygous for the causative mutation for DECCS in the FAM83H-gene.

Trait of inheritance: autosomal-recessive

Scientific studies found correlation between the mutation and symptoms of the disease in the following breeds: Cavalier King Charles Spaniel

**Episodic Falling - PCR**

Result: Genotype N/N

Interpretation: The examined animal is homozygous for the wildtype-allele. It does not carry the causative mutation for EF in the BCAN-gene.

Trait of inheritance: autosomal-recessive

sample ID: 2211-N-13136

Scientific studies found correlation between the mutation and symptoms of the disease in the following breeds: Cavalier King Charles Spaniel

The current result is only valid for the sample submitted to our laboratory. The sender is responsible for the correct information regarding the sample material. The laboratory can not be made liable. Furthermore, any obligation for compensation is limited to the value of the tests performed.

There is a possibility that other mutations may have caused the disease/phenotype. The analysis was performed according to the latest knowledge and technology.

The laboratory is accredited for the performed tests according to DIN EN ISO/IEC 17025:2018. (except partner lab tests).
